

ShopWala Orders & Account Help

Customer support guide for order management, delivery updates, missing items, and account access.

Canceling an order

- Customers can cancel an order from the My Orders section while the order is still marked Confirmed or Preparing for Dispatch.
- Cancellation is not available after an order has been shipped. If supported, the customer may refuse the shipment or request a return after delivery.
- For prepaid orders, an approved cancellation is refunded according to ShopWala's standard refund timeline.

Updating the delivery address

- A delivery address can be updated only before the order enters the dispatch preparation stage.
- Once the package has been dispatched, ShopWala cannot guarantee that the courier will be able to change or redirect the delivery address.
- Customers should contact support as soon as possible if they notice an address mistake.

Wrong, damaged, or missing items

- If an order contains an incorrect item, a damaged product, or a missing item, the customer should contact ShopWala within 7 calendar days of delivery.
- Customers should keep the package, outer packaging, shipping label, and relevant product materials until the issue has been resolved.
- Support may request photographs of the package, shipping label, or received item to verify the issue.

Order status and delivery help

- Customers can check the latest order status from My Orders.
- If tracking information shows the package as shipped, customers should use the available tracking details to follow the shipment.
- If the tracking status has not changed for an unusually long period, the customer can contact ShopWala support for assistance.

Account access and password help

- Customers who forget their password can use the Forgot Password option on the ShopWala sign-in page.
- Customers should never share their account password, card PIN, or one-time password with support staff.
- ShopWala support will not ask customers to disclose confidential authentication credentials.

Security reminder

- Never share OTPs, passwords, card PINs, or other authentication credentials with another person.
- If a customer receives a suspicious message requesting sensitive account information, they should avoid sharing the information and contact ShopWala through an official support channel.
